📇 Profile

Product-minded full-stack developer with experience leading entire development lifecycle — from ideation and architecture to launch and optimization. Demonstrates strong ownership, analytical thinking, and a passion for user-centered design. Adept at cross-functional collaboration, time management, and quickly adapting to new technologies. Focused on delivering high-quality, maintainable, and scalable solutions.

🎓 Education

ITMO University   09/2023 – present
                                                                  Saint Petersburg, Russia

Specialist Degree in Information Security

💼 Professional Experience

Toj Sokhtmon   10/2024 – 05/2025
Fullstack Web Developer & Product Manager   Khujand, Tajikistan
(Contract)
Led the full-cycle development of a real estate platform for a major construction company in Tajikistan.
Key achievements:
- Delivered frontend (Next.js) and backend (Django REST, PostgreSQL, Redis) independently
- Designed scalable database and multilingual interface (RU/TJ)
- Built real-time apartment filtering, interactive master plans, and dynamic PDF exports
- Integrated Telegram Bot and CRM for automatic lead generation
- Managed DevOps: Linux server config, CI/CD pipelines, HTTPS via Certbot

Salvadori Shop   10/2023 – 01/2024
Full Stack Developer (Contract)   Saint Petersburg, Russia
Built a premium e-commerce platform for fashion apparel from scratch.
Key achievements:
- Created React-based frontend with product filters, multi-step checkout, cart logic
- Connected Stripe/YooMoney payments, discount promo codes, and notification flows
- Developed Django backend with product, order, and inventory management
- Delivered a responsive, mobile-first UI with Formik & Yup validation

Wellcom   09/2024 - 11/2024
Full Stack Developer (Contract)   Saint Petersburg, Russia

Developed an automation platform for a private English school with a focus on educational content management.

Key achievements:
- Sole developer using React, Django, PostgreSQL
- Implemented role-based dashboards for teachers/admins
- Integrated TinyMCE-based CMS for lesson materials
- Developed multilingual support, SEO metadata, and contact/feedback modules
